**EXECUTIVE SUMMARY**

The Drought Communities Programme (DCP) supports communities in the most drought-affected regions of Australia.

On 7 November 2019, the Australian Government announced a further range of drought measures, including that it would provide $128 million under the Drought Communities Programme Extension to 128 councils, 122 of which had previously received funding and an additional six councils experiencing hardship due to drought. The 128 eligible councils will each be provided $1 million to complete local infrastructure and other drought-relief projects. This brings the commitment under the Drought Communities Programme Extension to $301 million since 2018-19.

Council met to discuss potential opportunities on Friday 15th November 2019.

Chief Executive Officer
Regional Council of Goyder
Market Square
BURRA SA 5417

Dear Sir

Re Drought Community Support

The Booborowie Community is proud of the fact that over many years we have been independently able to fund most of the projects that we have instigated in the Booborowie Township.

However as our major fund raising is from roadside cropping, two seasons of below average rainfall have reduced our income.

We wish to continue to maintain and upgrade our Recreation Ground precinct and are pleased that the younger members of the community have reformed the Tennis Club after some years, and a cricket "Blast" for under twelve children has commenced on Sunday mornings. This has involved over thirty children from the town and wider community.

Recent visits from Council’s Health Inspector has seen us recognise the need to upgrade some of our catering facilities.

Our oval irrigation system for some time has not provided adequate coverage and with the drier conditions we require a larger pump to provide greater pressure.

Accordingly we wish to apply for consideration to receive funding for the following projects.

- Pump and pipe to provide more water to the oval. $27,400
- 3 New tennis nets. $924
- New carpet for practise cricket pitch. $2,350
Net to protect windows of new complex from cricket balls $225
Dishwashers for Hall and Bowling Club. $9,746
Defibrillator for Bowling Club $2,495
Funds to hold a Community “Ease the pressure: Barbecue and entertainment. (games for kids, music, food and drinks) $1,000

Total $44,140

We attach quotes for the above mentioned projects and look forward to your favourable consideration.

Yours faithfully

R W Shattock

RON SHATTOCK
CHAIRMAN

Unicorn Brewery Cellars Concept Plan

Concept
Upgrade the Unicorn Brewery Cellars by appropriately activating the space to enhance its use and attractiveness to the tourism, business and educational sectors through touch, taste and smell.

History
The Brewery Cellars originally consisted of a tall malting tower, offices, cooper’s workshop, steam engine and boiler to operate the pumps and managers residence. The cellars, storeroom, manager’s residence and walls of the brewery block still remain.

The Unicorn was a well-equipped brewery with the brewing tower and other buildings built of stone, all enclosed by a stone wall. An engine room housed a five horsepower vertical steam engine operating force pumps and next to it was a wood-fired steam boiler. There were seven underground cellars, built of stone and brick, which could hold 500 hogsheads. The ale and stout had a good reputation largely attributed to the quality of the water and skill of the brewer; in 1880 a new well was sunk supplying the brewery with up to 2,000 gallons a day. By 1889 there were three brews per week and the Unicorn supplied all the hotels in Burra and surrounding districts as well as sending beer by rail to towns further north and to Broken Hill.

(Some brewers – Catchlove & Co. at Burra was one – continued to use imported English malt which at 11s a bushel (import duty was 2s 6d/bushel) was much dearer than Lion’s which ranged from 6s 6d and 7s 6d a bushel, and Beaglehole tried to persuade him to try Lion’s malt assuring him it was as good as English. In this instance he was successful and Unicorn ale was made with Lion malt. In the 12 months prior to September 1894 – the Unicorn brewed 73,200 gallons).

Of note: Brewer Edward Catchlove Lockyer was Mayor from 1881 – 1883 and Chairman of the District Council in 1895.

Strategic Pillars
- Economic Resilience
- Community Assets & Infrastructure
- Our Environment & Heritage is Protected & Valued
- Leading the Way

Objectives
- Future proofing the local tourism economy
- Job creation
- Public education and lifelong learning
- Community wellness
- Community pride

Features
- Micro Brewery, brewing days
- Events
- Bands
- Accommodation
- Education
Stage 1

Business Enterprise

- The Unicorn Brewery Cellars could potentially be used for smaller events that tie in with the Burra Christian Bible Chapel, Paxton Square Cottages and Heritage Garden.
- Council is currently in the process of trademarking “Unicorn Brewery Pty Ltd”.
- The Unicorn Brewery Cellars could be used to house a semi-permanent micro-brewery and distillery using original hops and brewed using traditional methods as this will bring credibility to the brand, enhance Burra’s unique heritage tourism and be a point of difference in a very niche market.
- The venue can still be used as a location for film/television, as it has been used before (The Water Diviner, Wolf Creek) it is extremely important not to detract from the visual appeal of the cellars in this market space.
- Venue for acoustic music or bands, weddings, engagements, celebrations, conferences etc with the assistance of a business consultant to prepare a whole of Goyder marketing event guide to be managed by the Tourism & Events Coordinator.

AIMS AND OBJECTIVES
- Starting Out
- Funding & Budgeting
- Event Equipment & Facilities
- Operational Requirements
- Programming Performances
- Stage Management & Equipment
- Communications
- Documentation & Evaluation
- Contacts / Links / Further Information
- Seminars / Presentations
- Traffic Management

Stage 2

Purchase 4 & 5 Bridge Terrace

Council has recently become aware of water seepage issues arising from adjacent properties (4 & 5 Bridge Terrace). The brewery cellars share a common wall with No. 4 and the owners of No. 4 have grown vegetation up to this wall, with seepage occurring upon garden watering. As a consequence the integrity of the wall is at serious risk of degradation.

The Conservation Management Plan prepared by Swanbury Penglase recognises the importance of the heritage places on Bridge Terrace and encourages adaptive reuse for community or commercial usage.

Purchasing No. 4 & 5 Bridge terrace would secure the brewery cellars as a complete asset (they were a part of the original brewery). Under No. 4 is a 10 x 8 metre room originally incorporated as part of the cellars network (not owned by Council) with significant degradation that is compromising the dwelling above.

Through good story-telling and promotion these could be marketed as ‘High End’ Accommodation and joint use with the Brewery Cellars as a Venue.
No. 4 contains a lined room in the backyard with the potential to turn this into a kitchen/prep area – this would eliminate the need to readapt the current cellars to include gas, water, sewerage etc. Removing the fence between No. 4 and the brewery cellars opens up the space lending itself to becoming a spill out area (beer garden).

RESTORATION

Storeroom

- White ants in beams, monitoring required ..............................................................
- Repoint stone walls in store room (top room) ......................................................
- Sand floors to even surface ................................................................................
- Access/egress ramp compliance ........................................................................
- Stairwell compliance .........................................................................................

Cellars

- Brush down friable materials from walls / ceilings ............................................
- Replace damaged stonework ..............................................................................
- Repair brick archways (only replacing brick where required) ..........................
- Remove salt laden soil, compact flooring to even surface ..................................
- Re-establish closed of cellar and alternate exit .................................................
- Refurbish exit hut and steps ...............................................................................  
- Review emergency access/egress compliance ....................................................

Note:

Flightpath are currently conducting a dilapidation report which will be completed in the new year.

REPURPOSE ADAPTATION

Fitout

- Removable bar with Unicorn Brewery trademark burn’t into front ....................
- Barrels and faux bags of hops with logos ...........................................................
- Traditional copper still with connections for tap beer ........................................
- Repurpose wagon table / bar ............................................................................

Audio Visual and Lighting

- Traditional ‘kerosene style’ lamps using LED in cellars ......................................
- Feature lighting for points of interest ...................................................................
- Projection (historical short movie) on loop on walls in cellars .............................
- Condense signage with use of audio story telling .............................................
- Short movie (water diviner, wolf creek II) get John Jarrett or Russell Crowe to tell the story .................................................................

Signage

- Use heritage materials rust, wood, copper barrels, hessian bags ........................
- Artistic and architectural impression of what cellars looked like – Future research, educational project by UniSA ..........................................................
- Include owners, workers as part of signage structures (past & present) .........

Note:
All above items should be removable so as not to detract from future usage or compromise the integrity of the heritage.
- Steel cut out of Henry O'Conloe-Lockyer.
  - With interpretive signage.

- Restore old wagon/cart located in Smelt's Party.
- Place railway sleeper planter box on top with hops planted to grow up hardwood timber frame.
Hi David,

Here are our best estimates for setting up the bore and associated works.

<table>
<thead>
<tr>
<th>Item</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power to the bore</td>
<td>$4,000.00</td>
</tr>
<tr>
<td>Bore</td>
<td>$10,550.00</td>
</tr>
<tr>
<td>Pump</td>
<td>$9,500.00</td>
</tr>
<tr>
<td>Solar Panels &amp; battery</td>
<td>$20,000.00</td>
</tr>
<tr>
<td>Trenching from bore to tank 200m</td>
<td>$1,200.00</td>
</tr>
<tr>
<td>50mm poly pipe from bore to tank</td>
<td>$700.00</td>
</tr>
<tr>
<td>tank</td>
<td>$16,000.00</td>
</tr>
<tr>
<td>float valve</td>
<td>$2,000.00</td>
</tr>
<tr>
<td>fittings to connect</td>
<td>$2,000.00</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$61,950.00</strong></td>
</tr>
</tbody>
</table>

Naturally the project will evolve as we find out how much water we can get out of the bore, how many hours per day the pump will run etc.

If you have any questions give me a call.

regards

Dick Clelland
Mrs. P. J. Edson
Secretary, Friends of Burra Railway Station
PO Box 304
BURRA 5417

Mr David Stevenson
CEO, Regional Council of Goyder
Market Square
BURRA SA 5417

15/12/19

Dear David, Mayor Mattey and Councillors,

On behalf of the volunteer group, the Friends of Burra Railway Station (FBRS) I wish to thank you sincerely for giving us the opportunity to be considered for the funding of the replacement heritage canopy at the Burra Railway Station.

I enclose drawings from Duncan McKendrick from Clare and a quotation from local builder, Clayton Helps. I appreciate the very tight time frame in getting this information to Council and we are very grateful to Duncan and Clayton for their support of our project.

Obviously for our small group of volunteers (average age 72!!) finding $103,000 is a challenge. We manage to raise sufficient funds for the maintenance of the station and the surrounds through regular fundraising (trading tables, baking biscuits, selling local produce, catering for events, hiring out the venue and running the Bed and Breakfast in The Porter’s Room) We are also grateful for the donations made by the thousands of visitors who have regularly supported us since the restored Station was opened to the public. However, without federal or state government support the building of the canopy would be well beyond our means.

2020 will be the 150th Anniversary of the coming of the railway to Burra. For the FBRS it would be the culmination of many years of dedicated volunteer time in the restoration both of the Station and the 1917 dining carriage, to also see the return of a replica of the original arched canopy that was taken down in the 1930’s. It would, we believe, be a fitting celebration of Burra’s rail history and provide the much needed cover for our timber carriage, as well as being a suitable addition to the heritage listed station building.
We also feel that Burra’s status as a Nationally Heritage Listed town would be further enhanced by this project, providing yet another drawcard to the Station for the many tourists who regularly visit the site.

We therefore respectfully request Council to consider our project as being worthy of the federal funding.

Thank you again for this opportunity,

Yours sincerely,

Mrs. Philippa (Pip) Edson
Secretary, FBRS.

Work Estimation Request

To: Burra Show Society

Date: 03/12/19
Estimation No: 1219-A

Description

Earthworks to be carried out at the Burra Show grounds including:

- Trenching for water hose reels to a minimum depth of 700mm to completely cover the designated camping area for fire suppression.
- A significant amount of rock breaking in hard will be required for the excavation of trenches
- Sieve and remove rock from site, import bedding sand for services
- Reshape areas to be more user friendly for the intended purpose.
- Reinstate all excavated areas with imported top soil or rubble as required.

Total cost for work proposed: $7,800.00 + $780.00 GST = Total $ 8,580.00*

*Please note this is an estimate and you will be charged accordingly. Less if conditions are favourable or additional cost may be incurred if ground conditions are rocky or if there is any other unforeseen circumstances.

We appreciate the opportunity to estimate on the above work and look forward to providing our services to you.

Regards,

James Mirtschin

Emily Moore
Executive Assistant to the Chief Executive Officer
Regional Council of Goyder
1 Market Square
Burra SA 5417

Via email: emoore@goyder.sa.gov.au

Dear Emily

RE:  Burra Master Plan – Mine Site, Burra Creek & Smelts Paddock Fee Proposal

Thank you for the opportunity to provide a fee proposal for the preparation of a master plan for these sites in Burra. This work will build on the research and ideas generated as part of the preparation of the Conservation Management Plan prepared earlier in 2019.

Scope

The services will be based on the email received on 11.12.19 and the nominated scope of works as summarised below:

▪ Prepare three master plans for the following sites; Burra Mine Site, Smelts Paddock, and the Burra Creek.

▪ Designs will be based on the research and analysis undertaken as part of the preparation of the Conservation Management Plan for Burra, and on other background documents and reports.

▪ Designs will be high level master plans with annotations and concept ideas, precedent images and materials / furniture / signage / planting palettes to back up the design intent and assist with costing.

▪ The master plans will be compiled into a report to capture the project process and propose short, medium, and long-term actions based on the recommendations of the Conservation Management Plan.

▪ We understand a cost estimate will be undertaken separately by Council.
Team

The Swanbury Penglase Conservation Management Plan team is best placed to undertake this work due to the intimate knowledge of Burra and our previous physical investigation exercise that was done in preparation of the Plan.

Our team will work together in an integrated approach to the design and production of the master plans.

Our team comprises of the following people:

- Andrew Klenke  Director
- Stephen Schrapel  Heritage Architect
- Heath Edwards  Landscape Architect & Planner
- Emma Dohrmann  Graduate Architect

Methodology & Program

We understand Council wants these master plans completed no later than the end of March 2020, and we confirm that our team can deliver this project within the required timeframe.

We propose a 2-stage process to complete this project over a 6 to 8-week timeframe beginning in late January with completion in mid-March 2020. This includes 2 x trips to Burra to meet with Council and undertake further site inspections. One in each phase of the project.

**Phase 1: Research & Analysis (Weeks 1-3; week starting 27th January 2020)**

- Obtain, review and coordinate all background material (Previous reports, CAD plans, survey and aerial photography information).
- Prepare a research and analysis report to set the basis for the master plans which will contain precedent ideas, issues and opportunities and design concepts for the scope of works.
- Organise a site visit and coordination meeting with Council in Burra to confirm the scope and program.
- Undertake a site inspection and measure / check to test ideas from the research and analysis report to ensure ideas are feasible, information is correct and whether any further information is required to inform the master plans.
- Finalise the research and analysis report to set the basis for the master plans which will contain precedent ideas, issues and opportunities and initial design concepts for the three sites.
- Liaise with Council for review, comment and approval of the report.
Phase 2: Preparation of Master Plan (Weeks 4-7 starting 17th February 2020)

- Based on approval of the research and analysis report prepare a master plan report for the three sites suitable for costing.
- Undertake a 70% design review of the master plan report with Council via phone / email
- Undertake amendments to the master plan report and finalise as a draft for comment
- Send and present the draft master plan report to Council for review and approval.
- Undertake amendments to the master plan report and finalise to complete the project.

Pricing and Payment
Based on the above scope, methodology and program, we offer the following fixed fee:

Swanbury Penglase
1. Research & Analysis $ 13,335.00
2. Preparation of Master Plan $ 15,680.00

Sub Total (excluding GST) $ 29,195.00
GST $ 2,919.50
TOTAL (including GST) $ 32,114.50

Work for future phases of this project and additional work will be charged at the following hourly rates (all ex. GST) or by other agreement:

Swanbury Penglase
Andrew Klenke $200
Stephen Schrapel $175
Heath Edwards $200
Emma Dohrmann $120
Terms and Conditions

Assumptions
The fee has been built up on the following assumptions:

- The existing AutoCAD concept base plan and site survey with aerial photography from the Conservation Management Plan will be used to generate the master plans.
- Client to manage any Community Engagement process.
- No liaison with community, landowners, services, statutory or government authorities has been assumed.
- Planning approval is assumed not to be needed.

Exclusions
The following elements have been excluded from our fee:

- Surveying / geotechnical investigation.
- Service locating / depthing.
- Site contamination investigation.
- Arborist and Tree Survey consulting.
- Cultural Heritage Survey.
- Traffic and stormwater modelling.

Accounts:

- Tax Invoices will be issued on a monthly basis
- Tax Invoices are payable within 14 days

Our terms of engagement are as per Australian Standard 4122-2010. A copy of this document can be made available for your reference if required.

We trust this submission provides the information required however should you have any queries or would like to discuss any of the above, please do not hesitate to contact us.

Yours faithfully

Heath Edwards
Project Director

RE: $14,775.00 Grant Application; Eudunda Caravan Park

Camp Kitchen/Shelter

In order to cater for current and future guests, ECBaT believes that it is imperative that the caravan park addresses the quality of amenities provided.

Currently there is no shelter or outdoor eating facility which has been brought to our attention by numerous guests.

A central meeting place with shade and a BBQ that visitors to our park can sit and enjoy is essential.

This construction would consist of a simple

- 3-sided shed/shelter (photo courtesy of Wall span) $4,090.00
- Free electric BBQ (similar to what is in public gardens BBQs) $2,950.00
- Bench with seating $1,250.00
- Electrics, lighting, trenching, cabling & protection $3,425.00
- Concreting – pad for shed $2,000.00
- Plumbing, water and waste $1,060.00

**TOTAL FOR CAMP KITCHEN PROJECT** $14,755.00

**Not quoted for in this application in the cost for development approval.**

***Quotes can be supplied on request***

ECBaT seeks your support to fund the provision of this Camp Kitchen/Shelter which will improve the overall experience for visitors to the caravan park and create a central meeting place for patrons which is highly desirable and strongly recommended in providing a quality tourism facility.

Please do not hesitate to contact me should you require any further information,

Kindest Regards

Judy Partington
Eudunda Show Hall

Relocation of HWU. Install new safety tray, run relief lines to gully. Have HWU connected to mains instead of rainwater. Includes altering pipework to include relief valve. Run HW lines to new hand basin and double bowl sink (supplied by customer). Thermostatic mixing valve to be installed on handbasin. Disconnect rainwater lines and connect and run new mains water to the kitchen sink and hand basin. Run new waste for both sinks and handbasin to external gully. Gully riser will need to be dug up and altered to suit new waste pipes. Removal of the old stand for HWU.

**Qualified electrician is required to alter power source for HWU**

(Quote valid for 30 days from date of quotation)
Please note: Current main switchboard in show hall is extremely dangerous and non-compliant with current Australian Electrical Standards AS3000:2018. It is highly recommended that the work in Quotation #1 should be completed prior to the kitchen area in Quotation #2.

Quotation #1

Upgrade main switchboard in show hall

- Disconnect power and remove existing old non-compliant switchboard.
- Remove timber panelling and install new 150A distribution switchboard.
- Connect all existing circuits into new safety switches and circuit breakers.
- Replace 2 x 15A power points that were part of old existing switchboard.
- Test installation.
- Issue electrical certificate of compliance.

Quotation #1 including parts and labour: $4,300.00 (inc GST)
Quotation #2

Upgrade show hall kitchen

- Disconnect and remove all existing wiring and sub-board in kitchen area.
- Junction existing light feeds that are no longer in use.
- Relocate existing power points that feed from mains sub-board.
- Install new sub-mains to a new kitchen sub-board.
- First fix for all new power points, lighting, light switches, oven and hot water service.
- Install new sub-board in kitchen.
- Supply and install all second fix materials for lighting and power.
- Connect existing stove with new isolation switch.
- Connect 2 x rangehoods.
- Install new safety switches and circuit breakers in new sub-board.
- Issue electrical certificate of compliance.

Quotation #2 including parts and labour: $5,500.00 (inc GST)

Thank you for the opportunity to provide this quotation. If there are any questions, concerns or to confirm the quotation please contact Richard.

Terms and conditions: This quotation is valid for 30 days from date of quotation. Payment to be made within 7 days of date issued on final invoice. This quotation is notwithstanding items that were not foreseen at time of quotation.
Regional Council of Goyder,
Dear Councillors,

I am writing a letter of support, requesting you consider helping fund the Eudunda Show Committee to upgrade their kitchen facilities, which although functional are in urgent need of bringing up to today’s standards.

You may consider some of these points:

- **The Eudunda Show is the region’s biggest annual event**, it highlights the success of this region, bringing together the whole community, who mingle with new visitors and also meet up with old friends.

- **Drought did not stop the Eudunda Show which highlighted our resilience and our willingness to help each other in tough times.** Indeed, through the hard work of the Committee sourcing outside funding, a strong local fundraising campaign and the generosity of the community and business in general the show was the best in many years. The show brought great pride to our farmers and city folk alike, a togetherness and kinship, and a place for the children to have some fun and forget the family troubles due to the drought, and much of the entertainment was put on FREE for the children by the Show Committee, recognising the family tight budget.

- **The Eudunda Show Pavilion is the region’s largest hall**, meaning it is an essential asset to the community.

- **Eudunda does not have a lot of large “venues” and to keep the Show Pavilion viable for catering will allow the community to have more scope for Major Events such as the up and coming Eudunda 150th Celebrations which will be held in November 2020 where the demand for simultaneous use of space is needed (including catering).**

- **Emergency Relief Centre (ERC) - The Eudunda Show Pavilion is a vital component in the State’s disaster planning, with the Eudunda Oval being a safe zone, collection point and Emergency Relief Centre (ERC) where for instance during the Pinery Fires there were an estimated 1,000 people facing the possibility of making camp and eating there overnight. The Show Pavilion was opened, and things being readied for people to sleep and eat there.**

  - The **Show Committee currently support two other major events in the region, both being State level competition events, that attract competitors from around Australia and Overseas, and many spectators.** During these events the Show Committee Fund-raise by catering for the riders or drivers, and also the support crews, officials & spectators. The funds raised are significant, contributing to help cover the show’s running costs.
    - 24 Hour Reliability Trial which attracts between 10,000 and 15,000 people to the district
    - Walky 100 Car Rally (approximately 500+ attend)

- **Auction events** are also held at the Show pavilion, and the show committee cater for these as well, and these events bring a completely different crowd to the district (approx 100 each time).

- **Current fundraising efforts not enough to fund kitchen replacement.** The current fundraising has been able to build the show up successfully, but the likelihood that it could cover the kitchen upgrade is small and would take years to cover, and the upgrade is needed urgently, so current fundraising can continue.

  **BASICALLY -** The Show Committee need to be able to attract more events so that fundraising can increase to cover the ever-rising costs of running the show, but to do that the show has to have a safe, modern, efficient kitchen.

Of course, I am biased, I have been part of the Eudunda Show since a boy, my parents and grandparents supported the show, I entering in the pavilion as a student, in the 80’s as a ribbon sponsor, and now, since 1999 been involved with displays, also as the Show Program Editor, Show President for 2 years, Show Sponsor (Web South) 2001 etc. I would like to point out that I am not alone, many people, businesses and organisations recognise the importance and value to the community of the “Local Ag Show” and have a long association with the show. I believe that my long association with the Region, the Community and the Eudunda Show gives me a strong perspective as to the importance of the Eudunda Show to the region and also an insight into how hard the committee work to deliver the show for the community and that they need urgent help to continue this effort.

Yours Sincerely
Peter Herriman
Eudunda Show Hall (or Pavilion) - Eudunda's largest meeting hall, shown here during the 24 Hour Trial 2019 – Rider Briefing.
Note the tables at the front partly set up ready for catering of the competitors when they come back to Main Control at the Eudunda Oval – to eat and rest at the Eudunda Show Hall.

Eudunda Show Pavilion – Show Day 2019 – with a marvellous number of entries (entries were up this year), showing the pride and work of the people in the region, willing to support the show.
To Whom it may Concern,

The Copyworld Walky 100 is Australia’s longest running State Championship car rally, celebrating it’s 35th year in 2019.

The Walky 100 is an integral part of the motorsport calendar in South Australia, and has been supported by the Eudunda and Goyder regions since it’s conception in 1984. The event brings 1000 competitors, service crew, and volunteer officials to Eudunda, increasing the tourism of the town, and inputting many tens of thousands of dollars in the rural economy in food, accommodation, and business support leading up to the event.

As the largest building in Eudunda, the Show Hall has been fundamental to the success and growth of the Walky 100. The Show Hall has been used in the past as our HQ building at the oval, where all of the event’s communications, briefings, emergency services, tracking, timing, and event control have been based.

The support from the Eudunda community has been absolutely critical to the event, and we are incredibly thankful for the Show Hall Committee’s continued efforts to support our great event. The committee has supported our event in many ways, and has worked through hail and shine to provide for my team of several hundred people.

Given the significant importance of the Show Hall, I ask that all possible support be provided to the Show Society for the further growth, improvement, and development of the venue.

I trust that the Eudunda Show Society will be supporting my event for many years to come, and I offer my full support in their endeavour to better their venue, and through that, their community.

Yours faithfully,

Jake Alker
Director & Clerk of Course
2019 Copyworld Walky 100
Mel Zerner  
1 Culley Ave  
BELAIR SA 5052  
4 December 2019  

To Regional Council of Goyder  

Letter of Support for Eudunda Show Society for Drought Relief Funding  

My name is Mel Zerner & I am a Patron of the Eudunda Show. I grew up in the Eudunda area & after completing my primary & secondary schooling, I have studied & worked in Adelaide for the past 45 years. However, I have always come back to Eudunda to initially play sports as well as visiting my parents, other family members & friends & supported various other projects in the region. I have always regularly attended & enjoyed the Eudunda Show over all those years.  

I acted as the Honorary Auditor of the Eudunda Show from 1995 to 1999 & have been a Patron since approximately 2004 to the present time. Over the last 15 years, I have noted how the Eudunda Show has grown both in activities & attendances. The last show on 10 November 2019 was an amazing day, with so many new attractions & things to do, I simply ran out of time to watch & enjoy all the events & exhibitions. The Show Committee should be congratulated on the organization & production of the show event. Based on the population of the Eudunda township & surrounding district, the attendance of nearly 2000 people is an amazing achievement. The Show is the major annual community event of Eudunda & it brings the wider community together. This is particularly important as the Eudunda area is in its third year of below average rainfall or drought & the excitement of the event & its planning is an important morale booster to the community. The Show brings many new visitors to the region as well as past residents returning to catch up with old friends.  

I understand that the Show Committee have been doing some fundraising of other community events to raise money to support the show. The Show Pavilion is the region’s biggest hall & its an essential asset to the community. The Show Pavilion is used for many community events such as the 24 Hour Reliability Trial & the Walky 100 Car Rally as well as being a vital component in the State’s Disaster planning with the Eudunda oval & pavilion being a safe zone, collection point & Emergency Relief Centre for people suffering from bush fires disasters.
The Show Committee need to be able to attract more events so that fundraising can increase to cover the ever rising costs of running the show, but to do that the show has to have a safe, modern & efficient kitchen. The likelihood of raising sufficient funds to cover the upgrade of the kitchen is small & would take years to cover, so a grant from the Drought Relief funding would give the upgrade funding a major boost. Eudunda does not have a lot of large venues & to keep the Show pavilion viable for catering will allow the community to have more scope for Major Events. The Eudunda 150th celebration will be held in November 2020 & the upgrade of the kitchen would provide a timely facility for the various events that will be held in the Eudunda district at that time.

I support the application for funding for the upgrade of the Show Pavilion kitchen from the Council’s allocation of funds from the Drought Relief funding.

Yours Sincerely

Mel Zerner

Why buy from us?

Official Leading Australian Dealer
Sony VPL-VW500ES 4K High Contrast Home Cinema Projector, Imagine the fully immersive cinematic quality of 4K in your own home. Our VPL-VW500ES home theatre projector gives you a 4096 x 2160 resolution picture, over four times better than Full HD. It's just like being at the movies.

The exceptionally high dynamic contrast ratio of 200,000:1 with 1,700 ANSI lumens brightness produces stunning detail and rich, faithful colour – even in well-lit rooms.

4K Native Resolution: Over 4x Better Than Full HD
No-compromises: the VPL-VW500ES provides 4096 x 2160 4K resolution (the DCI standard in digital cinemas). We used our professional cinema expertise to develop 4K SXRD™ panels and produce a 4K native picture with no artificial enhancement of pixels.

Ultra High Contrast Ratio and Brightness
Drawing on optical technology developed for the VPL-VW1000ES, we've achieved both high brightness (1,700 ANSI lumens) and high contrast (200,000:1 dynamic contrast ratio) in the VPL-VW500ES. So, you'll see crystal-clear, bright, detail-packed images – even in well-lit rooms.

Advanced SXRD Panels
4K digital drive panels minimize the space between pixels in every frame with an incredible response rate of 2.5-milliseconds. That's much faster, and more stable, than an LCD TV and produces ultra-smooth, dot-free pictures with natural, fluid movement – whatever the action.

TRILUMINOS Display
The VPL-VW500ES’s optical engine and SXRD panels incorporate our TRILUMINOS Display technology to produce a much broader colour range, reproducing more tones and textures than a standard projector system. The result is greater purity, depth and realism.

New Motionflow
We've simplified our Motionflow category. 'Combination' mode uses our 'Film Projection' and 'Motion Enhancer', adding frames to reduce blur and maintain brightness in thrilling, fast-moving scenes. Cinema purists can choose 'True Cinema' to retain the original 24 frames per second.

Reality Creation: Upscales Your Movies to 4K
As well as native 4K material, you can see your current Full HD Blu-ray™ or DVD movie collection upscaled for a 4K experience. Reality Creation is a Super Resolution technology that radically enhances Full HD content, even upscaling 3D movies for 4K.

Compatible with 'Mastered in 4K' Blu-ray Discs
Drawing on the same technology used to downscale 4K material for Full HD, the VPL-VW500ES gives you a near-native 4K experience with discs 'Mastered in 4K'. It’s as close as you can get to the 4K-pixel resolution and expanded colour range of the original.

Compact Design
A smaller optical engine means the VPL-VW500ES is approximately 18 cm shorter in length than our leading projector, the VPL-VW1000ES, so there's greater flexibility for installation.

Front-facing Fan
Because the fan is positioned at the front, you don't need to worry about wall space and room for air intake/exhaust when you install. This helps maximize the throw distance for bigger projected images.

Auto Calibration
After extended periods, colour can be automatically calibrated to the original factory condition. There's no need for extra calibration equipment or cameras; a built-in colour sensor stores all the necessary information.

Wider Zoom and Shift Lens
A 2.06 motorized zoom lens and wide lens shift range of up to 85% vertical and 31% horizontal gives greater installation flexibility – even when the ceiling is very high.

Picture Position Memory Matches Movie Aspect Ratio
The VPL-VW500ES has a picture position memory, which memorizes the position of the lens (focus, zoom, shift). Users can match a movie’s aspect ratio, including 1.78:1 and 2.35:1, and store these settings in the projector for easy recall.

Manual HSV Color Correction
A correction tool allows you to adjust the hue, saturation, and brightness of each colour to get exactly the picture you want.

**Industry Standard RF 3D Compatible**
A built-in RF transmitter synchronizes with any RF 3D glasses for wider coverage, greater stability, and there’s no need for an external transmitter

**The Latest 4K/60p HDMI Standard: 60 Frames Per Second**
The VPL-VW500ES can show up to 60 frames per second in 4K (at colour signal YUV 4:2:0 / 8 bit). It’s the new 4K industry standard and is much higher than the earlier 24p. The result is a smoother image with superior colour and realism

**Electronic Panel Alignment**
Ensures the red and blue elements in each pixel are precisely positioned against green. Adjustments can be made by as little as 0.1 pixels for optimum clarity

**USB Updates**
To get the best from your projector, the VPL-VW500ES has a USB port for the latest firmware updates

**Key Features**
- 4K native resolution: over 4x better than Full HD
- Ultra high contrast ratio of 200,000:1
- High Brightness of 1700 ANSI lumens
- Advanced SXRD panels to produce ultra-smooth, dot-free picture with natural, fluid moment
- Triluminos Display for broader colour range, reproducing more tones and textures
- New Motionflow to reduce blur and maintain brightness in thrilling, fast-moving scenes
- Industry standard RF 3D compatible, built-in RF transmitter
- Reality Creation: upscales your movies to 4K
- New 4K standard: 60 frames per second, means smoother image with superior colour and realism
- Compact Design
- Front-facing fan
- Wider Zoom and Shift Lens
